### **DETAILED ACTION**

The Amendment filed on October 30, 2006 has been acknowledged.

#### ***Terminal Disclaimer***

The terminal disclaimer filed on October 30, 2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Patent 6,998,833 has been reviewed and is accepted. The terminal disclaimer has been recorded.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 16 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 16, it is unclear how the reflection coefficients can be selected before it is determined (means for selecting a set of reflection coefficients to be implemented by the determining means).

The remaining claims are also rejected under 35 U.S.C. 112, second paragraph, for being dependent upon a rejected base claim.

***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-10, 12, 13, and 16-27 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claims do not produce any tangible results. The practical application of the claimed invention cannot be realized until the information determined is conveyed to the user.

For the result to be tangible, the computed S-parameters would need to be outputted to a user or displayed to a user or stored for later use by a user. Hence, the claims are treated as non-statutory functional descriptive material (see MPEP 2106 and <http://www.uspto.gov/web/offices/com/sol/og/2005/week47/patgupa.htm>).

### ***Response to Arguments***

Applicant's arguments filed on October 30, 2006 have been fully considered but they are not persuasive.

With respect to the 35 USC 101 rejections, Applicant argues that the amendment to the claims, "... the S-parameter calculator storing the computed S-parameters of the network in memory" overcomes the 101 issues.

Examiner's position is that it is not recited in the claims that the stored S-parameters can be retrieved by a user. According to MPEP 2106.IV.C(2)(b), "... the tangible requirement does require that the claim must recite more than a 35 U.S.C. 101 judicial exception, in that the process claim must set forth a practical application of that judicial exception to **produce a real-world result**. Benson, 409 U.S. at 71-72, 175 USPQ at 676-77". Since the stored S-parameter cannot be retrieved by a user, a real-world result cannot be realized.
